Thanks Dan; looks like I ran out of time for review but anchor assures me they're using the same plan as at gasco- Sorry about that. S

Sean –

Just a heads up that PGM diver survey work will begin this coming Monday, September 18<sup>th</sup>, taking advantage of the favorable weather. If you find anything in the plan of concern, please feel free to contact either me or Anchor (Todd Thornburg) directly before the end of the week.

Saw your comments to Melody White on the PGM Sediment Investigation application; appreciate your input.
